Nice pictures, Sliding bars are cool. To do lists are good.

I liked the course information section

I would have liked to have had something like this before i started first year so that I would have felt more prepared to start the year and wpuld have been less stressed as i would have had a better understanding of what the structure of the course was going to look like.

everything

I liked the course overviews

Easy to find stuff, structured in a nice way.

The accessible nature of it and the quiz

The information provide from every section. The ability to change from light mode to dark mode. The ability to manage my own todo list.

Easy functionality. Very useful. The information present was something I would have found useful as an incoming student

The different sections under each topic about what is involved in the course

What did you dislike the most about the website? ⓘ

Nothing

Nothing really

I liked it and found it easy to use.

nothing

The design, in the little what type of chemist are you, you can't read the text due to the colour scheme

On the quizzes for what kind of chemist you would be, it was very difficult to read the options

That it's only for 1st and 2nd year!

Very difficult to login as a new user.

The to do list which disables could perhaps give a pop up prompt for the user to sign in

The my to-do list but I think that might have been my error

In Academic resources, the find out more tabs are at different levels which don,t look good. The to do list is too long (off the screen) to have a scroll across bar

For the course information maybe link resources to take you to that section for example if you did physics when you click on optics you'd be able to click on one of the subsections and start learning about it from there. I know this would be a lot of work but I feel it would make the app incredibly useful.

No

NA

maybe add a navigation guide on the home page

Thought it would be useful and was good

n/a

N/A

None

Maybe commonly used websites that would be good for throughout the course. Also maybe links to the books we use
